FULL STACK DEVELOPER | INFORMATION SCIENCE ENGINEER

Results-driven Full Stack Developer skilled in MERN stack, DevOps, and Cloud Deployment, with hands-on experience building scalable, AI-powered, and data-driven applications. Adept at designing secure, efficient systems using React.js, Node.js, Docker, SQL, and REST APIs. Completed multiple internships delivering production-ready solutions that improved performance and automation. Passionate about crafting impactful software and contributing to fast-paced engineering teams.

TECHNICAL SKILLS

Languages: Python, Java, C++, C

Frontend: HTML, CSS, JavaScript, React.js, TailwindCSS, Redux

Backend: Node.js, Express.js, Flask, REST APIs, Authentication

Databases: MongoDB, MySQL, PostgreSQL, SQL

DevOps & Cloud: Docker, CI/CD, Git, Cloudinary, Apache, JWT, bcrypt

Tools: VS Code, GitHub, TensorFlow, spaCy

PROJECTS

Imagify – AI Text-to-Image SaaS (MERN + OpenAI API) – Built a platform generating AI-based images with JWT-secured authentication and public gallery. Optimized API response time by 27% using caching and asynchronous calls.

LiveLingo – Real-time Chat App (MERN + Socket.IO) – Developed instant messaging with MongoDB persistence and JWT-based user sessions. Scaled concurrent connections by 40% through event-driven architecture.

AI Admission Chatbot (Flask + ML + MySQL) – Automated 85% of admission queries with 87% accuracy and 92% user satisfaction, reducing admin workload by 60%.

Excel Data Analytics App (React + Python + AI) – Enabled Excel file uploads and auto-generated 2D/3D AI-driven charts with business insights. Improved visualization performance by 35%.

INTERNSHIPS

Web Development Intern | Zidio Development | Apr 2025 – Jul 2025 – Built a MERN blog platform with secure login, Cloudinary uploads, and admin dashboard. Developed AI analytics app integrating Excel uploads with automated charts.

AI-DevOps Engineer Intern | Rooman Technologies | Oct 2024 – Mar 2025 – Designed CI/CD pipelines using Docker, Git, Flask, and TensorFlow. Built AI-automation improving DevOps workflow efficiency by 30%.

Front-End Developer Intern | Bharat Intern | Aug 2023 – Nov 2023 – Created responsive landing pages using HTML, CSS, JS. Improved page load speed by 25% and mentored interns.

CERTIFICATIONS

- Data Analytics Job Simulation – Deloitte (2025)
- Solutions Architecture Job Simulation – AWS (2025)
- Data Visualization: Empowering Business Insights – Tata (2025)
- SQL Micro Course – Cuvette (2024)
- Certified Python Developer Associate (CPDA-24) – Techcert Labs (2024)
- AI-DevOps Engineer – Rooman Technologies (2025)
- Web Development – Zidio Development (2025)

EDUCATION

Bachelor of Engineering – Information Science & Engineering

Sir M. Visvesvaraya Institute of Technology, Bangalore

Dec 2021 – May 2025 | CGPA: 7.2 / 10
